PROJECT

Health Insurance Web Application

Overview:

Health Insurance Web Application is an ambitious project aimed at creating a cutting-edge online platform for Health Insurance services. As the Front-End React Developer, my role will be pivotal in shaping the user interface and delivering an exceptional user experience.

Key Features:

User-Friendly Interface: Collaborate with the design team to craft an intuitive and visually appealing user interface that ensures a seamless browsing experience.

Responsive design: Implement responsive web design principle using React to ensure that the application is accessible and user-friendly on various devices, including mobile phones, tablets, and desktop computers.

User Authentication: Work on user registration and login components to ensure secure storage of policy information and account management.

Quote Generation: Develop the front-end components for dynamic quote generation module allowing users to input details and coverage preference to receive instant insurance quotes.

TECHNOLOGIES TO BE USED:

- Front-End Framework: React.js
- User Interface: HTML5, CSS3, Bootstrap
- State Management: Redux (or React Context API)
- Responsive Design: CSS Grid, Flexbox
- User Authentication: JWT (JSON Web Tokens)
- Version Control: Git and GitHub.

EDUCATION

BE (Mechanical Engineering) – Dr D Y Patil School of Engineering Academy, Pune	2022
Diploma (Mechanical Engineering)- SSSPM's Polytechnic, Barshi	2019
10th – Maharashtra Vidyalaya, Barshi	2016
